

MID YEARS **ENGINEERING EXPERIENCE** CONFERENCE
MYEE | **2015**

SAVE THE DATE:
MARCH 22 - 24, 2015

Hilton College Station & Conference Center
College Station, Texas

Addressing student success for Sophomore and Junior year college students

What: The Mid Years Engineering Experience (MYEE) Conference 2015 is a new conference dedicated to the critical middle years of the engineering curriculum and educational experience.

Join us in a national conversation on improving engineering student retention and success in the mid years, the sophomore slump or invisible year, and addressing the junior year shift to discipline-specific, professional preparation known as the junior jump. The MYEE will offer attendees and presenters an opportunity to meet and collaborate with other engineering educators and help form a new community of faculty, staff and administrators focused on the middle years.

Call for Extended Abstracts: Engineering education scholars are invited to submit extended abstracts to be considered for the conference. Selected authors will be invited to submit full papers for the special issue of *Advances of Engineering Education*, focused on the middle years.

Hosted by: Dwight Look College of Engineering at Texas A&M University and the Texas A&M Engineering Experiment Station

For questions, contact: myeec@tamu.edu or visit: myeec.org

IMPORTANT DUE DATES:

January 25, 2015

Short Abstracts & Workshop Proposals (500 Words Max)

February 9, 2015

Extended Abstracts (1,500 to 3,000 Words)

February 13, 2015

Final Notification of Authors

February 23, 2015

Early Registration Deadline

March 1, 2015

Final Version of Abstracts for Proceedings
